SKILLS

- Java, Python
- Selenium, PyTest, Behave, BDD, Rest Assured, TestNG, Cucumber
- Automated Testing: Selenium WebDriver, Page Object Model, Hybrid, TDD (TestNG), BDD (Cucumber)
- API Testing: Rest Assured, Postman
- Manual Testing: Comprehensive test case development, regression testing, re-testing, smoke testing, sanity testing
- Test Management: TestRail, Jira, Trello
- CI/CD: Jenkins, Azure Pipeline
- Version Control: Git, GitHub
- Data Validation: Pandas (including handling large datasets)
- Cloud Platforms: AWS, GCP
- Operating Systems: Windows
- Methodologies: Agile/Scrum, Waterfall
- Reporting: Allure Reporting
- Database Interaction: SQL Server, PostgreSQL

PROFILE

A highly skilled Automation Test Engineer with 4.6+ years of experience in developing and executing automated test scripts using Python and Java. Proficient in various testing frameworks and tools, with a strong background in software quality assurance. Known for a meticulous approach to identifying and resolving software defects, ensuring high-quality software delivery. Passionate about continuous learning and staying updated with the latest industry trends.

WORK EXPERIENCE

Sr. Associate - Quality

Synechron Technologies Pvt.Ltd.

Feb'24 to till date

- Develop Automated Test Scripts using Selenium, PyTest, and Behave.
- Execute Test Cases and analyze results to identify defects.
- Perform API Testing using parameterization concepts.
- Use Pandas for Data Validation.
- Independently gather and analyze requirements for comprehensive test coverage.
- Implement and maintain CI/CD pipelines using Jenkins and Azure Pipeline.
- Collaborate with development teams to resolve issues.
- Document test results and report defects.
- Manage testing environments including PowerBI, AWS, GCP, and telemetry systems.
- Stay updated with the latest testing tools and techniques.
- Use Pandas for Data Validation.
- Write test scripts using 10 lakh records.
- Perform data validation for web UI automation.
- Ensure data integrity and accuracy.
- Develop test plans to cover all scenarios.

Software Automation Tester

Humancloud Technologies Pvt.Ltd.

Feb'22 to Dec'23

- Developed and executed Selenium test scripts.
- Conducted browser compatibility testing.
- Created robust and scalable automated test suites.
- Ensured web application quality and functionality.
- Designed and implemented automated test scripts for API endpoints.
- Handled request and response data.
- Ensured reliable and efficient API interactions.
- Improved testing processes and software quality.
- Created feature files with Gherkin syntax.
- Defined step definitions and integrated them into test scripts.
- Enhanced collaboration between technical and non-technical team members.
- Automated and managed build and deployment processes.
- Utilized Allure reporting for comprehensive test reports.
- Enhanced visibility and communication within teams.
- Organized, documented, and tracked test cases efficiently.
- Streamlined testing processes and ensured comprehensive test coverage.

EDUCATION

Master of Computer Applications

Society's Institute of Management
Studies, Career Development and
Research (IMS)
2017-2019

EXPERTISE

- Test Automation:
- Proficient in designing and implementing robust test automation frameworks.
- Hands-on experience using tools such as Selenium and Rest Assured.
- Developed a scalable Page Object Model (POM) framework for Findem, enhancing test efficiency.
- Manual Testing:
- Extensive experience in crafting and executing comprehensive manual test cases.
- Ensured thorough coverage of functional and non-functional requirements.
- API Testing:
- Demonstrated proficiency in API testing using tools like Postman and Rest Assured.
- Validated data integrity, endpoint functionality, and performance across various projects.
- Database Interaction:
- Implemented database testing strategies, including data setup and validation.
- Ensured the integrity and accuracy of application data.
- Collaboration and Leadership:
- Proven ability to initiate and lead testing initiatives independently.
- Collaborated closely with cross-functional teams.
- Provided expertise in user story discussions, scope finalization, and successful project delivery.
- Test Case Estimation:
- Conducted thorough test case estimations.
- Contributed to effective project planning and resource allocation.
- Successfully estimated test efforts for Findem.
- Tools:
- Proficient in utilizing testing tools such as Jira, Trello, Jenkins, and Allure Reporting.
- Streamlined testing processes and enhanced collaboration within the development team.
- Expertise:
- Consistently contributed to the successful delivery of high-quality software solutions.
- Met or exceeded client expectations.

WORK EXPERIENCE

Software Automation Tester

Humancloud Technologies Pvt.Ltd.

Feb'22 to Dec'23

- I took the lead in initiating and developing a testing framework for Converge using the Page Object Model (POM) design pattern. As the sole contributor, I:
- Implemented best practices in test automation.
- Enhanced the project's maintainability, scalability, and overall efficiency.
- Improved test development and execution, contributing to the project's overall success.
- Developed and executed comprehensive manual test cases, ensuring the quality and functionality of the Converge project.
- Integrated test data into the database to:
- Validate and ensure data integrity throughout the testing process.
- Conducted thorough API testing to:
- Verify the functionality and performance of the project's APIs.

QA Engineer

Brainizen Technologies Pvt Ltd.

March 2021 to Sept 2021

- I tested the Nebory application on a wide range of devices using Browserstack software. Additionally:
- Conducted API testing in Postman.
- Developed test cases to cover all functionalities.
- Logged defects for issues found in the bug tracking tool.
- Identified and developed an optimized regression test suite.
- Executed test suites in alignment with the release plan.
- Performed regression, re-testing, smoke, and sanity testing.
- Demonstrated the ability to understand Software Requirements Specification.
- Reported bugs using Jira, Trello, and DevOps.
- Participated in discussions on user stories and scope finalization for modules, working closely with developers.
- Involved in test planning, estimation, and tracking.
- Created test plans and test strategies for various sprints in the product.
- Feel free to use this in your resume or any document you need! If you need further adjustments, let me know.

QA Engineer

CodeToArt Technologies Pvt Ltd.

2020-2022

- Conducted manual testing on multiple platforms, including different operating systems (iOS on iPads, Android on mobiles/tablets). Key activities included:
- Developed comprehensive test cases covering all functionalities.
- Performed regression, re-testing, smoke, and sanity testing.
- Demonstrated the ability to understand Software Requirements Specification.
- Reported bugs using Jira and Trello.
- Actively participated in discussions on user stories, contributing to scope finalization for modules and individual user stories.
- Maintained close collaboration with developers.
- Played a crucial role in Test Planning, Estimation, and Tracking.
- Created Test Plans and Test Strategies for various sprints in the product.
