WORK EXPERIENCE

COFORGE Limited.   SEPT 2023 - PRESENT

Technical Architect (UI)

- AI Bot Messenger for Banking Solutions: Designed and developed a React-based chat and information window, integrating Azure for speech recognition, user authentication, CSV-based user creation, and chat transliteration.

- Import/Export Management System: Supported technical operations for vehicle parts import/export, resolving issues, developing unit tests, creating a datagrid POC, and implementing strategic decisions including NGINX setup.

Nagarro Software PVT. LTD   JULY 2016 - SEPT 2023

Associate Staff Engineer

- Legal Access Management (09/2022 - 06/2023): Converted a desktop application to a web-based application on MS Azure Cloud, using React JS, Elsa Workflow, and Material UI to register new customers with personal information, case history, and documents.

- Look-Up Internal Tool (08/2020 - 09/2022): Developed an internal web application for finance processes, broker and sales activities, and homebuyer management using React JS, Vue JS, Material UI, Google Analytics, and Agile framework, ensuring mobile responsiveness and integration with Google Analytics.

- Endpoint Security (02/2019 - 07/2020): Implemented endpoint security for document sharing between intranet users and administrators, using Vue JS 2+, SonarQube Linting, SSO, and Tableau Integration. Led team handling, code reviews, and feasibility/design analysis discussions with the client.

- Platform Development (07/2016 - 12/2018): Created a project management platform for handling vendors, orders, and materials, developing the UI based on client requirements using JavaScript, jQuery, Bootstrap, GWT, and React JS/Vue JS.

AON Hewitt India   OCT 2014 - JUNE 2016

Senior Software Engineer

- Beneficiaries Flow: Implemented a beneficiary management system with features for adding, editing, removing, and deleting beneficiaries from existing plans. Conducted requirement analysis, coding, and device testing using jQuery, Bootstrap, CSS3, HTML5, and Alloy UI. Implemented custom features on CK Editor used in Liferay Portal.

Living Media India Today   JAN 2014 - OCT 2014

Web Developer

- Ecommerce Application : Developed and optimized widgets, including sliders, NAV, and product zoom in/out for an ecommerce website. Also created a device-view website on different URLs. Ensured code standards, browser compatibility, and page optimization using JavaScript, HTML, CSS, and web-responsiveness..

Alleviate Technology   JAN 2013 - JAN 2014

UI Developer

- UI Development: Created UI widgets for sports, news, and events, and implemented campaign pages using JavaScript, jQuery, HTML, CSS, XSLT, and WordPress. Provided CMS support to editors, ensuring seamless content management and updates.

Net Linker   JUNE 2011 - DEC 2012

Junior Software Developer

- WordPress-Based Websites: Designed and developed responsive WordPress websites utilizing jQuery, HTML, and CSS for global clients. Enhanced digital traffic engagement through effective web design and development.
